

LaCie d2 DVD±RW Drive

16x DVD±RW 8x Double Layer

**DOUBLE LAYER
TECHNOLOGY**

DVD±RW IN ONE DRIVE

This universal drive delivers four DVD formats in a single device. By combining DVD+RW and DVD-RW formats, the LaCie d2 DL DVD±RW Drive delivers greater creative versatility by eliminating the need to choose one format over another. This combination drive is also capable of writing to CD and DVD formats, which are compatible with nearly all existing DVD-Video players.

CREATE ORIGINAL VIDEO DVDs

Record professional-quality, personalized DVDs with your LaCie d2 DL DVD±RW Drive and the included authoring software. Import video and audio footage from your DV camcorder, arrange your sequences, and burn projects onto DVD or CD-Video discs. Completed DVDs can then be played back on virtually any DVD player to share among family and friends.

DOUBLE LAYER TECHNOLOGY

With new double layer DVD recording technology, the d2 DVD±RW Double Layer Drive can be used to store nearly twice as much data as current DVD media — 8.5GB on a single-sided DVD disc. Save up to 16 hours of VHS video, 4 hours of high-quality MPEG-2 DVD video or up to 8.5GB of data, audio or images. Large-capacity, double layer DVD media is also ideal for backing up computer systems or archiving MP3 libraries on a single disc.

RECORD CUSTOM DVDs IN MINUTES

Offering the fastest DVD record speed on the market in an aluminum design, the LaCie d2 DL DVD±RW Drive features 16x record speeds in DVD-R and DVD+R formats. This all-in-one rewritable drive also features FireWire and Hi-Speed USB 2.0 ports for easy connection to any Mac or PC, making it the most versatile drive available.

- Multi-format DVD rewritable drive
- Double layer recording technology
- Create brilliant 8.5GB video DVDs
- Versatile, metallic design

FEATURES

- 16x DVD±R and 8x DVD±RW drives in one
